
ASSIGNMENT FOUR

Create a mini FTP server –Without FTP protocol- and create a client program that connects to this server.

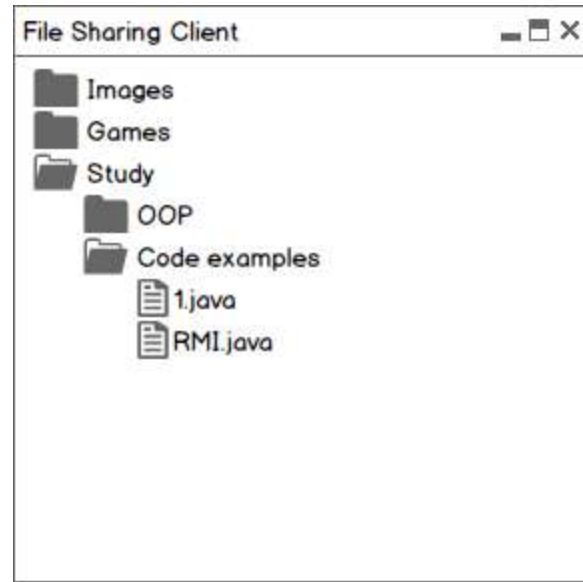

This server can be used by multiple clients. Find the server and client details in the document.

Server Details

The sharing path textbox is the folder that will be shared to the clients.

Client Details

The client tree-view will draw the content of the shared folder.

Bonus: Double click a file to download it.

Hint: This assignment can be done but one or two students.
